

Mediașul în lumina cronicicii medievale și a literaturii istorico-geografice (secolele XVI-XIX)

Lucian GIURA*, Enikő-Gyöngyi KNALL**

Abstract

Mediaș in the Light of the Medieval Chronicles and the Historical-Geographical Literature (16th-19th Century)

The authors are creating an incursion in the century-old history of Mediaș, an important locality of Transylvania, by selecting information, more or less extensive, presented in diachrony, pointing out some moments from the rich local history. The authors present economical and political information, urban-architectural assessments, demographic data, iconography and cartography. Corroborating this information with others of the same nature bring more light to a more complex understanding of the history of this locality, proving their usefulness in this sense.
