Abstract

The Structure and Content of the Education System of the County and Inter-County Party Schools in the Communist Romania

The party education system was created by the Romanian communists following the model of the party schools web in USSR, for the propose of training the Romanian Workers/Communist Party cadres and ordinary members, syndicates and youth organization members, with both political and ideological knowledge, general culture and specific knowledge. This system was aiming the formation of cadres, who after the graduation were to occupy positions of responsibility in the central and local structures of the Party or in the state institutions. This article proposes to analyze diachronically and synchronically the organization structure and the content of party education system, at the county and inter-county level as well as the relationship between them.

Keywords: *communism, party education system, cadres schools, party schools web, curricula*
