

Dear Sir/ Madam,

We are very pleased to extend to you this invitation to join us on the **9th February** for the **Space Endeavour Tech Games**, an online event dedicated to facilitating networking among stakeholders in space tech and IoT.

The second cohort of the IoT Tribe Space Endeavor accelerator is at the end of the acceleration program, and the 7 European start-ups involved in the program will be pitching their business during this dedicated session. We will be showcasing a series of digital solutions and novel technologies, ranging from space-tech enabled cybersecurity for complex supply chains to low-earth orbit picosats.

Participation is free, however accessing the meeting platform requires pre-registration. We kindly invite you to register for this exciting event on the [dedicated platform](#).

We are looking forward to welcoming you at the IoT Tribe Space Endeavour Tech games on February 9th!

The Endeavour Space Hub team

Tech Games Agenda

Timings indicated below are in CET (GMT+1).

10:00 Welcome

- Samantha Clark, Stakeholder and Content Lead, IoT Tribe
- Brendan Rowan, Programme Manager, Space Endeavour

10:10 The Decade of Space

- Frank Salzgeber, Head of Innovation and Ventures Office, ESA

10:30 Tribe Spacetech

- [Latitudo40](#) - real-time urban planning data
- [Fossa Systems](#) - accessible low earth orbit pico-satellites

10:45 Old Tricks for New Space – Scaling Tech, Teams & Markets: A market view

Moderated by Tanya Suárez, Founder, IoT Tribe

- Shaun Stretton, Lead for Space Control and Information Solutions Sector, CGI

- Esperanza Cuenca, Senior Leader, Major European Banking Institution
- Vincent Clot, Open and Business Innovation Leader, Thales Alenia Space France
- Americo Lenza, Portfolio Director, Hive, British Gas

11:10 Tribe Spacetech

- [Asvin](#) - securing IoT devices in the field
- [Geckomatics](#) - AI powered mobile mapping

11:25 Old Tricks for New Space – Scaling Tech, Teams & Markets: An Investor Fireside Chat

Moderated by John Spindler, AI Seed and CEO, Capital Enterprise

- Martin Gonzalez, Investment Manager, Nekko VC
- Uli Fricke, CEO, FunderNation

11:50 Tribe Spacetech

- [ARX Alliance](#) - enabling cyber-security across complex supply chains
- [HD Signs](#) - hyperlocal logistic data for optimised route planning
- [Secapem](#) - explainable AI in Defence

12:10 Closing Remarks and virtual networking

12:15 Networking

13.00 End

About IoT Tribe Space Endeavour Accelerator

The programme intends to expand the impact and adoption of European Space Tech by bringing together Space start-ups, SMEs, entrepreneurs and the IoT ecosystem to increase commercial relevance of the technologies across industrial sectors and accelerate their access to market and/or scaling.

Taking European space tech, integrated surveillance networks, data from Copernicus, satellites, and micro constellations for secure communication, computer vision from fighter pilots, and integrating into market-ready solutions across verticals.
